PROJECTS

Project Title: Breast Cancer Prediction Using Machine Learning and Implementation with Web Application

Description: In our web-app, we can accurately determine whether or not a person has breast cancer and provide individuals with advice on how to deal with breast cancer. We have a history page, About-us page, User profile page, Contact-us page, and a history page. Admin has the ability to add, modify, remove, delete users, make a user an admin, and so on.

Stack: Machine Learning, Python, Django, Bootstrap, HTML, CSS, Google-Colab.

Pet Shop: This website is designed for animal lovers who want to buy or sell their pets, foods, and medications. Anyone may post images of their pets and provide details about them to sell on our website. Our website needs users to sign up or sign for save data in database.

Stack: PHP, MySQL, Bootstrap, HTML, CSS.

RESEARCH PAPER

Bio-fuel Production Using Biodegradable Waste (Team Project)

Description: The objective of our project is to utilize biodegradable waste such as kitchen wastes, food wastes, and so on. In this project, we have built up a small-scale biogas plant and a monitoring system to meet up the expectation of our cooking gas by producing biogas utilizing our own kitchen wastes and also monitor that biogas plant so that the proportion of raw materials remain exactly the amount needed and gas production is being continued. As a result, our project's ultimate aim is to create a prototype that contains-

- Biogas Plant
- Integrated monitoring system
- Links to the house to provide gas
- Devices to monitor the real data through WIFI

CAPABILITIES

- Work effectively both in individual and group.
- Committed to bear the responsibility.
- Good communication Skills.
- Good time management.
- Quick learner.

LANGUAGE PROFICIENCY

- Bangla
- English
